

GLEBE 2

ALTERATION & ADDITION

This project brief was very similar to the adjoining property however the client wished to feature the city skyline and restore the original facade to new.

The brickwork was pointed by quickbrick and all timber and lace work was sourced from Fedwood and installed by AOCA

Internally we used recycled 152mm NZ Cowrie to match the existing and then it was stained a rich mahogany to match the new staircase and handrail.
