ALTERATION & ADDITION

This original terrace along marlborough lane is one of four project alterations completed by AOCA P/L to this street alone.

Well known in the area the client requested that AOCA install a very modern and airy theme.

The bathrooms were setout to suit glass mosaics to the walls and floor.

The ground floor dining room was finished with a liquid applied epoxy resin over new concrete and in floor heating.

The rear bi-folding doors are from Dorma and suspended from a steel portal frame and cost \$12,000 alone.

The attic space was rebuilt to allow for inclusion of a new dorma, ensuite and bedroom with central staircase.
