

GLEBE 6

ALTERATION & ADDITION

The owner of this residence is well known building designer Derrick MacRae from DM Designs based in Glebe.

Derrick was very particular with his requirements and attention to details.

The design cleverly embraces new modernism with features reflecting Glebes heritage, and despite being quite small, it incorporates the multi use of space.

The laundry is located adjacent the kitchen and hidden behind matching joinery.

Soft lighting and tallwood timber floors feature internal areas and a natural ground fall under the building is incorporated in the building design.

An internal garden and lightwell is used exclusively adjoining the bathroom and the beauty of the rear garden is captured by wall to wall aluminium bi-folding doors.
