ALTERATION & ADDITION

AOCA was approached through recommendation from previous clients.

The client was very nervous and unsure as to the total scope of works required.

We ended up agreeing to use a cost plus contract as the extent of works was small and tricky and some items like the internal cavity sliders were to have feature glass inserts in anodised aluminium frames.

Specialist suppliers were asked to visit site to match the new internal sliders to the external door and highlight systems.

The client was living in a heritage listed home with a building focus on modernism so we ended up incorporating new features with function and style alongside classic period home features such as paddington cornices and 230mm high skirtings.
