

ART OF CONSTRUCTION AUSTRALIA | RESIDENTIAL BUILDING

## ROSEVILLE

### ALTERATION & ADDITION

The clients original architect was terminated and we were asked to nominate an architect to work with AOCA and the engineer Northrop to complete the design development.

Sam and Mark from Studio R agreed to undertake the design and the client was very pleased with the end result.

Steelwork was supplied by Jeska steel from Charmhaven and all glazing by John Muscat from Airlite windows and doors.

The bathroom floors were finished with limestone and the walls with large format ceramic tiles.

All floors were finished with 6 inch Blackbutt flooring over a concrete slab supplied by Greg from Building Material Direct and laid by AOCA P/L
